

VX DIRECT WIRELESS

EFFICIENCY EXPERT

WIRELESS PAYMENT, PERFECTED.

There's never been an easier or more efficient way to securely handle payment and value-added transactions. VeriFone's VX Direct Wireless solution provides merchants a complete package of needed hardware, software and convenient services. Leverage the latest 3G wireless technology. Receive timely software updates. Enjoy integrated NFC and EMV smart card capabilities. Remove sensitive cardholder data from the enterprise and reduce PCI scope. All in one, cost-effective, managed service.

EFFICIENCY EXPERT

Highly Efficient and Cost Effective

- Provides all the capabilities needed to process debit, credit and EBT payments – as well as gift card, top-up, loyalty and other value-added transactions – for a single, bundled fee
- Delivers consolidated reporting, analytics and more through VeriFone's PAYware Connect gateway
- Offers discounted cloud-based estate management – including remote key injection, remote feature implementation and consolidated, web-based transaction processing

Fast and Flexible

- Features the VX 680 – VeriFone's full-function, portable payment device packed with performance and the latest 3G technology – to make quick work of transactions

Perfect for Business on the Go

- Trim design is easily handed to customers – while large, crisp, color touch screen and blue backlit keypad is easy to read under all kinds of lighting conditions
- Lightning-fast processor speeds processing and keeps lines moving
- Intuitive, ATM-style interface minimizes errors and decreases training demands
- Expansive memory – with 192 MB standard, topping out at more than 500 MB built-in with Micro SD memory storage – to run virtually any number of applications

- Accepts mobile wallets and emerging chip-based, smart card payment with optional, integrated NFC and EMV capabilities
- Enables merchants to quickly respond to changing business requirements and opportunities
- OTA (Over The Air) downloads for quick, efficient updates of applications

Stringent Security Protections

- Offered with VeriShield Protect, providing end-to-end encryption and advanced tokenization to prevent fraud and misuse
- Removes virtually all sensitive cardholder and transaction data from merchant environment, significantly reducing PCI scope and risk of data breach
- Ensures compliance with the latest standards through regular downloads
