

The VX 680. Durability meets capability.

UPGRADE TO VX 680

UPGRADE TO THE VX 680

Why should businesses upgrade from the way MTT to the VX 680? The VX 680 is equipped with upgrades that are not present in the way MTT including enhanced features, streamlined key entry steps, and more! This sheet provides a quick overview of the improvements.

IMPROVED FEATURES

Large keys and backlit keypad

- Easy to read keypad –use in virtually any lighting setting
- Larger keys help reduce key stroke errors

Easy to use color touch screen

- Touch screen functionality – enables options to be easily selected
- Large color screen improves image visibility

Improved navigation

- Functions can be selected or deselected by keying the menu number followed by pressing the green “enter” key or red “cancel” key

Integrated printer

- No need to “point and print” - a high speed printer is built-in

Longer battery life

- Longer battery life means more transactions

The VX 680. Durability meets capability.

KEY ENTRY DIFFERENCES

With the VX 680, the log on and log off process is streamlined. Check out the differences below.

way MTT

LOG ON required
The VX 680 doesn't require the LOG ON step.

LOG OFF required
The VX 680 doesn't require the LOG OFF step.

VX 680

No LOG ON or LOG OFF steps are required.
At the start of the day, power the terminal on by holding the green "ENTER" key down and then press the WTG icon.

At the end of the day, select RECONCILE, then hold the red "CANCEL" key down to power off.

The VX 680. Durability meets capability.

GETTING STARTED

3 Steps for Getting Started with Your VX 680

1. Power on the VX 680 by holding the green enter key down. Touch WTG and select option 2, Check Updates. This will ensure that all the setup changes for your terminal have been completed. After the Check Updates is complete, your VX 680 is ready to use.*
2. At the end of the day, be sure to Reconcile. This will print your daily report and clear out your old transactions.
3. The VX 680 has a sleep mode to give longer battery life. If you do not want the terminal to go to sleep, keep it plugged in to the AC charger.

* The battery must be fully charged prior to using the VX 680 the first time.

PASSWORDS

If the terminal prompts for Admin Code or Admin Password, enter the default passwords listed below.

- Admin Code – 123
- Admin Password – 123123
